

INVESTING
YOUR
FUTURE.

The logo for MONFI, featuring a stylized 'M' icon followed by the letters 'ONFI' in a bold, sans-serif font.

WHAT YOU NEED TO KNOW ABOUT THIS PROJECT?

Microloans - are small term loans issued for a short period of time, usually not more than a few months.

Microloans can be made by banks, and non-bank lending institutions and usually require minimal formalities to obtain. However, having high interest rates and penalties for late payments are very expensive.

WHY IS IT IMPORTANT TO PAY ATTENTION?

It's important to us

to save

your money

and

grow your capital

which is

the most

important

task in this day

and age.

THE PROJECT HAS DIVISION INTO **THREE** PHASES:

01.

Crowdfunding activities aimed at raising funds and their redistribution at a more favorable interest rate for the profit of all participants in a given project.

02.

Activities related to microloans to individuals Individuals of European origin and residing in Europe.

03.

Tokenization project — holding ICO.

We give these funds under the insurance guarantee, individuals under the interest rate of which counts from 10% to 25% per month.

Our project is fundamentally and mathematically sound. We have an insurance guarantee in case of non-repayment of loans.

We make an honest statement about our payouts and maximum available interest rates, they're not over the top, but justified.

WHY DO YOU NEED MICROLOANS?

It's simple, each of us has faced the need for money, where there is not enough €500. It is either not possible or inconvenient to ask our loved ones, and there are many reasons for that.

In any case, to borrow money from us and return €550 is not much money for the borrower.

With an insurance guarantee, a staff of analysts, lawyers, we know for sure to whom we give the money loan and how it will be repaid.

WHY DO WE NEED TO ATTRACT INVESTMENT?

Our greatest strengths are experience, knowledge and financial tools. The microloan project has existed more than 2 years on the market.

You can't do it alone and together we can do more. With us, you keep your money from denomination and devaluation, and you grow your capital.

It is important for MonFi to have more funds in its liquidity, as the company's net income grows exponentially.

HOW DOES IT WORK?

Every investor in our platform or token holder, receives a fixed return on contribution up to 30% per annum.

Profits are paid out every month by the 10th day, the principal amount of the investment is paid to the investor's proposed account at the end of the investment period.

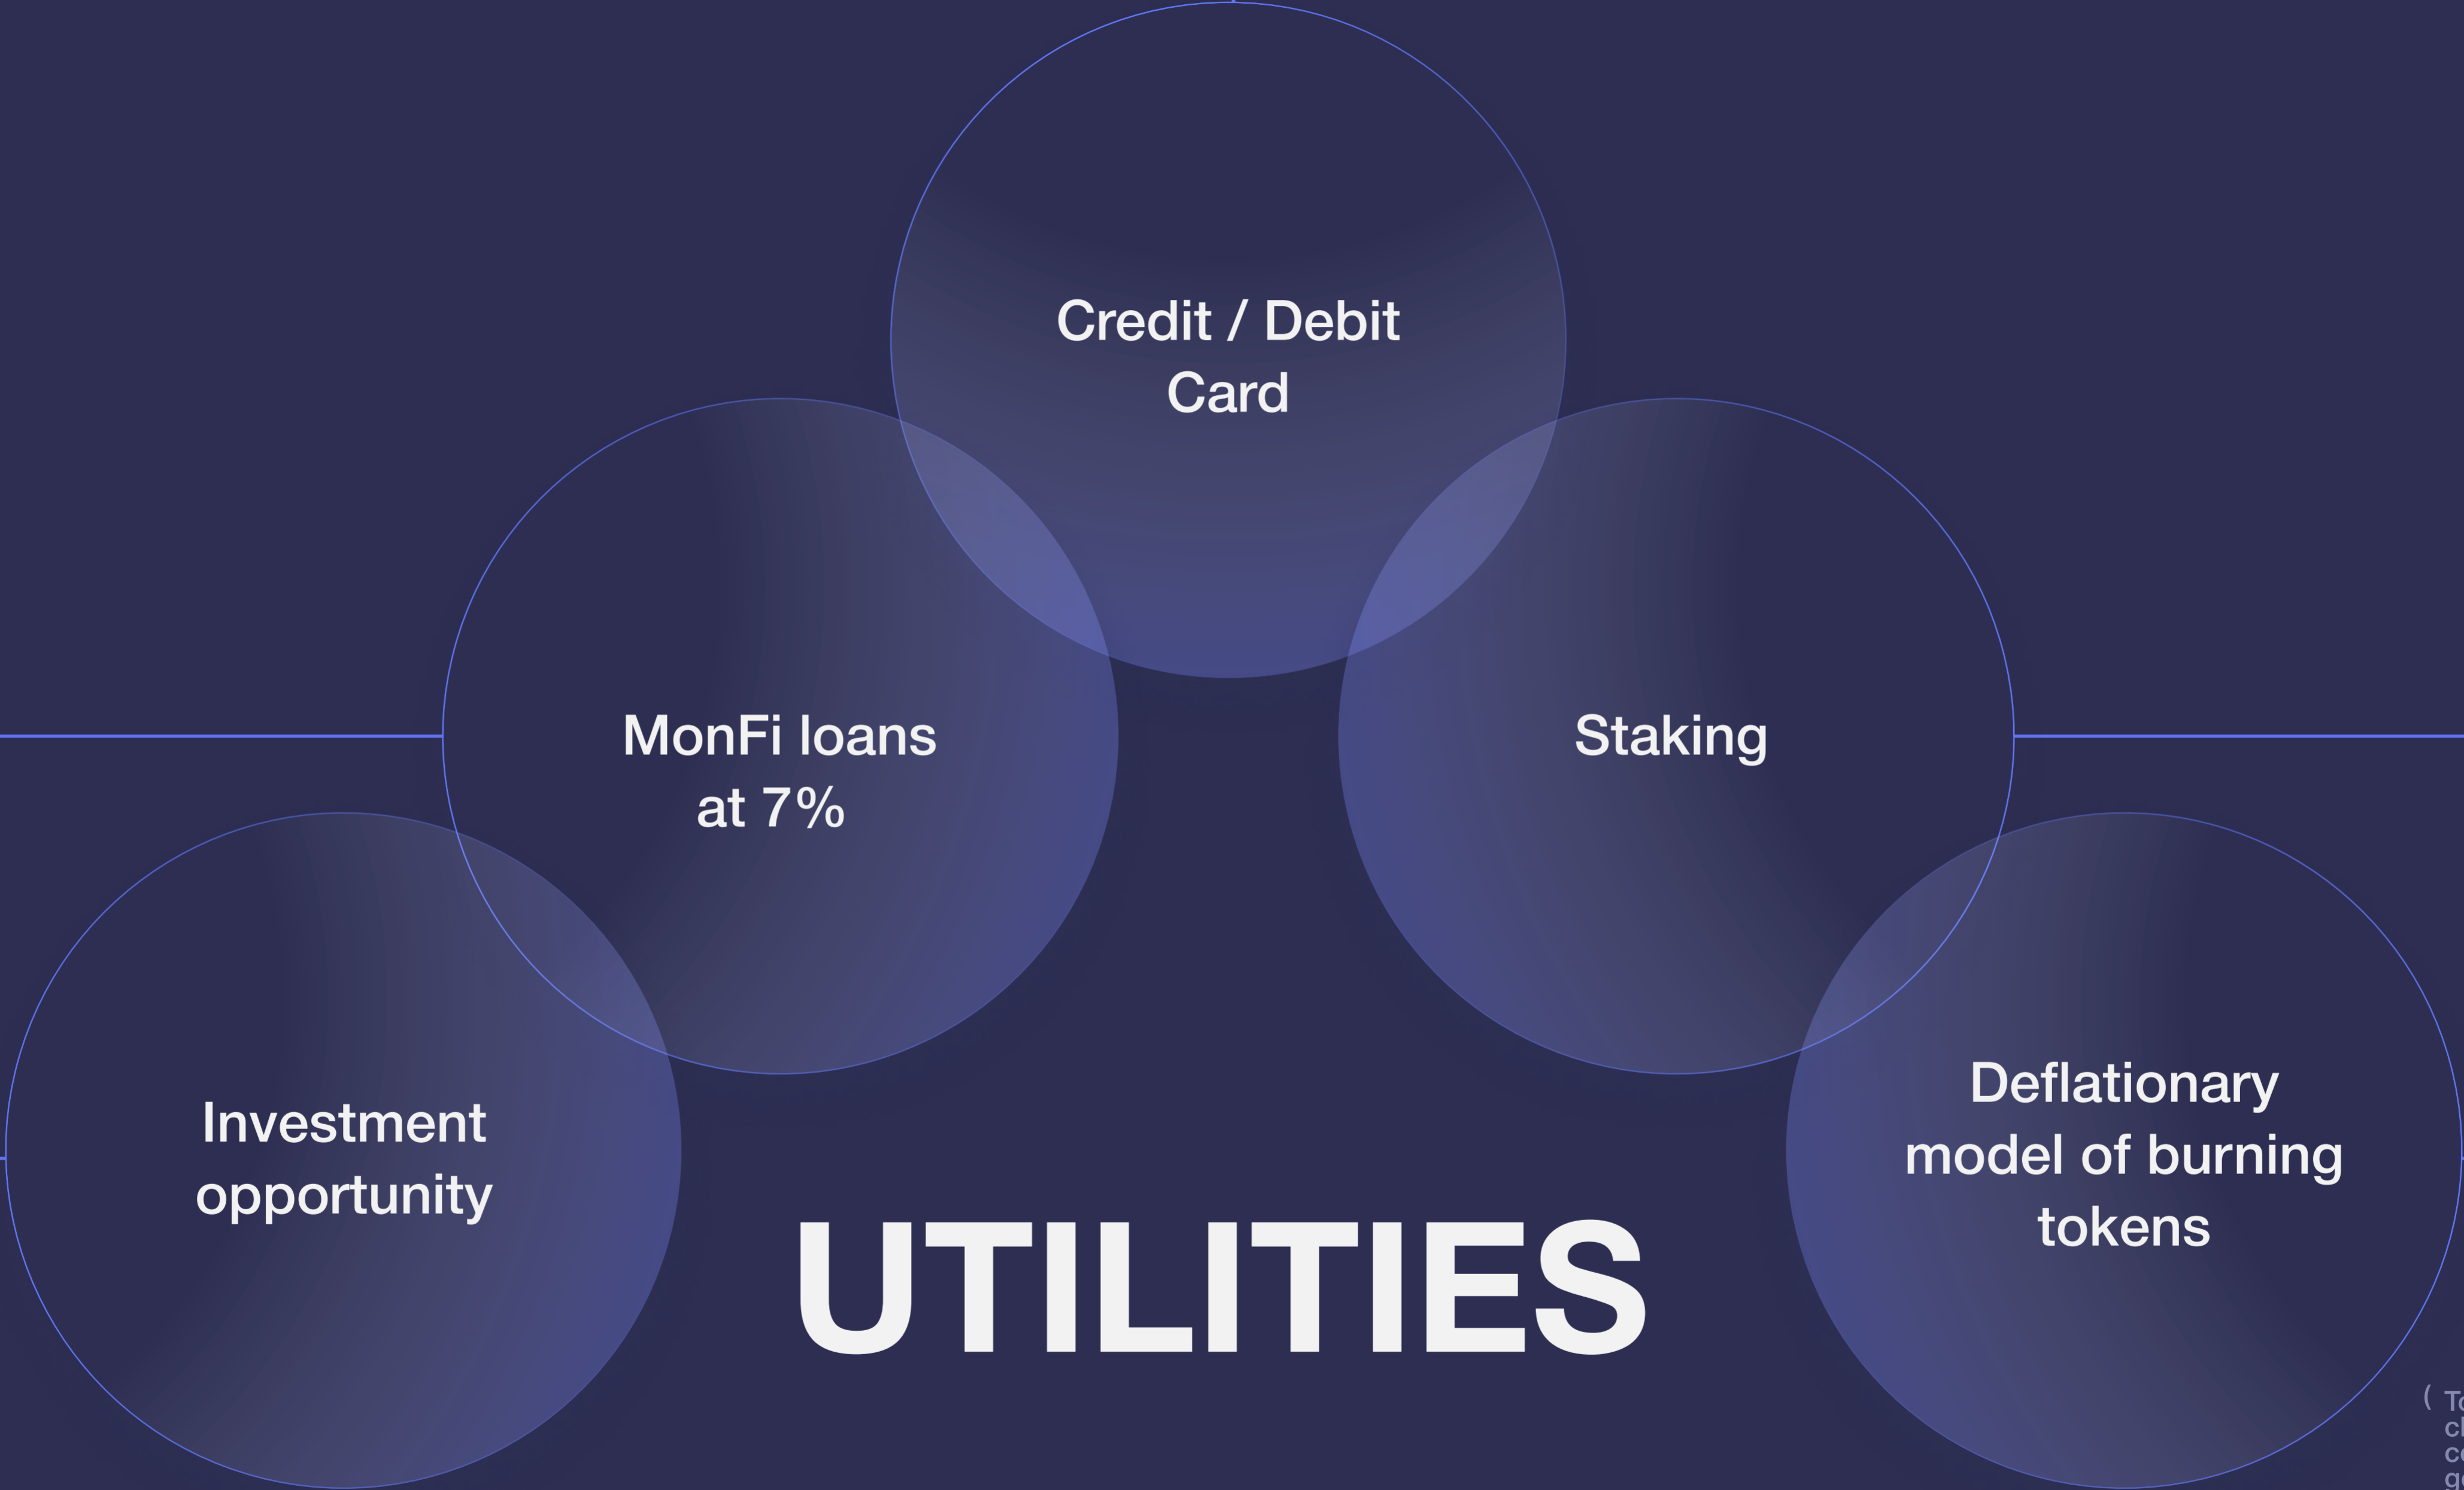

Our loans are insured and guaranteed to be paid back.
